

84 Lumber meets Antigua

84 Lumber Company World Trade Director, Mark Reginelli, has been in contact with an Antiguan builder to supply building material for his personal residence. 84 Lumber is supplying zip panels, flooring, pressure treated lumber and various engineered wood products. We are still quoting other products, including but not limited to roofing material, windows and doors. We look forward to start shipping containers next month.

Mark Reginelli understands the importance of building a relationship with contacts from all over the world. While showing this builder that we are trustworthy in supplying material for his personal home, 84 Lumber is proving to be a trustworthy source for his business as well in the future.
